

SUPPORT MESSAGE BY
YBRS. ENCIK ROSHDI BIN HJ AHMAD
ACTING CHIEF EXECUTIVE OFFICER OF CYBERSECURITY MALAYSIA

Cybersecurity today underpins the integrity of Malaysia's digital ecosystem, enabling the secure delivery of services, protection of data, and continuity of operations across both public and private sectors. As digital adoption accelerates, exposure to cyber risks increases correspondingly, necessitating sustained investment in capabilities, coordination, and trust.

The evolving threat landscape is characterised not only by increasing frequency, but also by heightened technical sophistication and scale. The use of advanced technologies, including artificial intelligence, has enabled threat actors to operate with greater precision and speed. Addressing these challenges requires a structured and coordinated approach that integrates technical expertise, operational readiness, and cross-sector collaboration.

In this regard, CyberDSA 2026, taking place from 5 to 7 October 2026 at MITEC, Kuala Lumpur, serves as a strategic platform to advance these priorities. It brings together cybersecurity professionals, industry leaders, and government stakeholders to exchange insights, strengthen operational capabilities, and align efforts in managing cyber risks.

CyberDSA contributes meaningfully to these efforts by fostering practical engagement and knowledge exchange. It supports the development of relevant capabilities, promotes the adoption of effective security practices, and strengthens coordination across the national cybersecurity ecosystem. Such alignment is essential to ensuring that responses to cyber threats remain timely, effective, and sustainable.

CyberSecurity Malaysia remains committed to advancing a secure and trusted digital environment for Malaysia. Platforms such as CyberDSA are instrumental in realising this objective through sustained collaboration and continuous capability development.

I look forward to welcoming you to CyberDSA 2026 as we strengthen collaboration and reinforce the foundations of a secure and trusted digital ecosystem.
