

**YB GOBIND SINGH DEO
MINISTER OF DIGITAL MALAYSIA**

We live in a world dominated by digital communications and transactions. While technology has evolved rapidly and continues to grow, the same can be said about cybersecurity challenges and threats.

The exponential increase in digital operations across organisations and businesses in all sectors, both in Malaysia and worldwide, underscores the fundamental principal that such operations must be secure. This is key to growing the economy, and more importantly, to safeguard the interests of users and stakeholders.

As such, it gives me great pleasure to support the Cyber Digital Services, Defence & Security Asia 2024 (CyberDSA'24). This is a landmark event that will see interesting insights from industry experts and stakeholders. This event will naturally provide a platform for potential collaborations and possible solutions to cybersecurity challenges.

Malaysia remains committed to ensuring the nation remains digitally safe, evident in the establishment of the Ministry of Digital. As we embrace technological advancements and digital transformation, we must never let our guard down. We remain steadfast in harnessing the vast opportunities available in the digital space, as we look forward to creating job opportunities, assisting the digital industry, and turning Malaysians into a digitally-savvy nation.

Events like CyberDSA'24 serve as a catalyst for innovation, while enabling us to collectively strengthen our digital defences.

To all those involved in CyberDSA'24 – the organisers, strategic partners, exhibitors, and participants – your continued support and commitment in this field is highly commendable. I am confident this event will contribute significantly to positioning Malaysia as a digital hub on the global stage.
